

NAME: _____

GRIDS FOR KIDS

DIRECTIONS: At a dig, an archaeologist sketches everything he or she finds in a *grid box* like the one below.

Help Dr. Dig! He found some interesting items while digging. (They are shown below.) But, he forgot to put them in his grid box. Help him out and plot them in the grid. Draw each item so that its marker dot fits at the given set of coordinates. (If possible, recreate your finished grid on the computer, and then move the objects around.)
